Additional Backup Information

The City's contract with Balcones Recycling for processing the City's residential single stream recyclables requires that the parties identify a backup transition facility for Balcones Resources to handle the recyclables should Balcones' new facility not be ready to receive the recyclables before October 1, 2012. Council requested that the location of the backup transition facility be presented to Council for approval. As the date approaches, if it is determined that the backup facility is necessary, specific terms for Balcones' use of the City's facility will be determined.
